

Nursery Theatre Tech Spec

Lighting

- Console is a Jester Zero 88, 24 channels
- We currently have 17 of these channels patched up & in use:
 - Stage left R, G, B, W
 - Stage Right R, G, B, W
 - Side of stage 2x LEDS with R/G/B/W, both LEDS on the same channel (each colour separate, so these take up 4 channels)
 - Aka Chauvet 12345 Amber LED x 3: Left, centre, right
 - House
 - Bar
- Console also contains a USB input if you wish to programme a show or bring a pre-programmed show. It is where the small desk light currently is. NB You MAY NOT programme directly onto our system, you MUST use your own USB

Sound

- Soundcraft 6 channel mixer
- Channels setup:
 - 2 x DI boxes (located near the piano, by the curtain stage left)
 - L&R to standard headphone jack for mp3/laptop/phone
 - God mic, located on a small stand by the tech deck
 - Stage mic, located on a full stand in the far corner by the piano & back curtain
- 3 microphones total are available (the two set up and one spare) 2 x Shure SM58, 1 x Shure SM485
- 2 full microphone stands are available (including the one set up)
- Electric piano (Yamaha Clavinova CLP-240) This can be plugged into the mixer if required but usually this is not necessary as it is self amplified
- Two Martin audio speakers (CDD6B), located above stage left & stage right

Projector

- There is a projector located in front of the central pillar, above the back row. The standard aspect ratio/focus of this is 12.5' x7.5' (about 375cmx225cm)
- The projector visuals can be plugged into a laptop at the tech deck, with HDMI or Thunderbolt
- The projector audio can be plugged into a laptop at the tech deck, with standard headphone jack
- At present there is no projector screen, you are welcome to bring your own, or you may project onto the black curtain at the back of the stage
